

EASI ® Internet Licenses

Introduction

Easy Analytic Software, Inc. (EASI) is a New York-based independent developer and marketer of demographic data and software solutions that provide reports and maps with unique search and analysis tools. EASI provides targeted site analysis software and updated demographics and related data for standard (Block Groups, Census Tracts, ZIP Codes, Cities, Counties, CBSAs, States, and the US) and customized geographies. Included with all software is an easy to use mapping tool that does address lookups, point maps, ring studies, create quintile analysis, and more. EASI has been in business since 1995 with over 1,500 clients who use our databases, software, and services.

Take a moment to read the [Testimonials at our Website!](#) While there you can also test our software - for free. EASI offers key reports from the 2000 Census. Thousands of corporate, magazines, colleges and other users go to our site for their Census demographics.

Internet Licenses – 4 Choices

Easy Analytic Software, Inc. (EASI) offers 4 Internet licenses. These annual licenses are designed to meet a variety of demographic needs. Our web products allow users fast, simple access to current demographic data, analysis, and mapping. The features include; address lookups, basic mapping, analysis, standard reports for all geographies, trend reports, EASI ® Significant Variable reports and 3-ring site selection reports.

All Internet licenses offer these standard geographies: Block Groups, Census Tracts, ZIP Codes, Cities, Counties, CBSAs, States, and the US. Custom geographies can be arranged for FCC geographies, sales territories, etc.

All Internet products provide the same features - the amount of data or number of available reports is different. **Note: Each July an update will be provided.**

1. The Right Site ® for the Web – Executive Report – is a perfect entry-level product for users who need just the essential current information available at their fingertips. This product includes: population, households, income, race, median age, employment, and other key data – over 40 variables. The standard version of this includes *all* geographies: Block Groups, Census Tracts, ZIP Codes, CBSAs, Cities, Counties, States, and the US *Note: Internet publishers can link from their sites*

directly.

2. The Right Site ® for the Web – Professional Reports - is a designed for *analysts* who need a broad spectrum of geographically oriented data. These analysts work for companies who regularly require demographics for decisions for location analysis, real estate planning, advertising, sales, marketing, or potential analysis. Internal corporate or outside consultants will find this a great tool with instant access to key information (326 demographic variables). The available reports include: demographic details such as an age by sex, race by households, income, family characteristics (including income) education, housing, and many other key demographic characteristics. Other variables include; basic Consumer Expenditures, Retail Sales and Store Groups, Quality of Life, and other important marketing information. All demographic variables contain 4/1/2000 (benchmark), 1/1/2011 (current estimate); and 1/1/2016 (forecast).

3. The Right Site ® for the Web – Advanced Reports – is our most comprehensive collection of data for sales, marketing, and demographic analysis. Users of the Advanced need access to a myriad of demographics for reports and analysis. The Advanced is also an ideal reference source for those who need access to key information throughout the year. This version, with over 1,900 variables, offers analysts massive amounts of data and reports with an easy to access interface.

With over 100 standard reports incorporating data such as: age by sex *and* by race and ethnicity, race by households, income by households *by* race and ethnicity, family characteristics (including income), education, housing, business employment and counts, 600+ consumer expenditure estimates, Retail Sales and Store Groups, Quality of Life, and many other key variables. All demographic variables contain 4/1/2000 (benchmark), 1/1/2011 (current estimate); and 1/1/2016 (forecast).

→→→Advanced Users ONLY – includes Life Stage Analysis as well – FREE!

EASI will also prepare a custom Web report for each subscriber to the Advanced. This will give a user an opportunity to customize the exact report that will combine all the key variables that are important to them. (EASI can also develop special private or multiple versions as well. Call for details.)

4. The Right Site ® for the Web – EASI® Life Stage Clusters

EASI has developed a simplified clustering system called Life Stages which forms a neighborhood social stratification system. A primary goal of the EASI development effort has been the creation of a cluster system based on a Life Stage model. Life Stage Clusters are a neighborhood classification system based on the crucial factors that determine life's key decisions. It is a community-oriented scheme that identifies and quantifies the factors that are involved in moving to a specific location. To accomplish this goal EASI's statisticians have spent hundreds of hours analyzing thousands of multivariate models against the vast EASI demographic database, and organizing the results into a simplified system designed for non-statisticians.

Life Stage Database - Three years of estimates; Census; current year and a five year forecast

Life Stages is a separate product available at the EASI web site - see fax order form.
