

ZIP PLUS 4 Centroid/Census to Block Group Geographic Conversion File AND EASI Carrier Routes/ZIP4 Updated Demographic Files

Introduction

Easy Analytic Software, Inc. (EASI) is a New York-based independent developer and marketer of desktop and internet demographic data and software solutions that provide demographic reports with unique search and analysis tools. EASI provides targeted site analysis software and updated demographics and related data for standard and customized geographies (Block Groups, ZIP Codes, Cities, Counties, CBSAs, etc.). Included with all software is a simple to learn mapping tool that does street lookups, point maps, ring studies, create quintile analysis, and much more. EASI has been in business since 1995 with over 1,500 clients who use our databases, software, and on-line services.

Take a moment to read the [Testimonials at our Website!](#) While there you can also test our software - for free. EASI offers key reports from the 2010 Census. Thousands of corporate, magazines, colleges and other users go to our site for their Census demographics.

ZIP4 Conversion File

EASI maintains information that relates each residential ZIP+4 to its appropriate Block Group. EASI also identifies the longitude and latitude for the ZIP+4's. This annual updates is a key component in the EASI update methodology.

This file can be used by direct mailers and others who need to summarize their ZIP+4 information into standard Census geographies such as Block Groups or Census Tracts. It can also be used to display on a map of a ZIP+4 analysis.

Carrier Route (CR) or ZIP4 (Z4) Demographic Files

The CR or Z4 Demographic files assist direct mailers and others to data mine for their top mailing areas and their best customers by associating key current demographic components with every residential ZIP4 in the US.

EASI has developed four distinct CR or Z4 data files to provide users with the best possible opportunity of analyzing their lists and customers for optimal results. These files are designed to be used alone or in combination with each other.

The Right Site ® Methodology for Carrier Routes and ZIP Plus 4 Updates

There are no official Census estimates for detailed demographics below the Block Group level EASI has developed a methodology that estimates, for the over 37 million residential ZIP Plus 4 (Z4), a reasonable value for a variety of key demographics based upon a statistical likelihood estimate.

Basically, EASI first estimates the number of Households within a Z4 based upon a relation of Z4 mailable households (developed from postal files) to mailable households at the actual Block Group that the Z4 is located in. Once that Z4 Household estimate is created EASI then estimates the Z4 key demographics. EASI has develop a distinctive approach that uses an inverse weighting formula based upon the distance that the Z4 is from its nearest Block Groups.

Note: CR files are summed from Z4 files.

EASI can also prepare customized CR or Z4 data (\$5,000 for up to 9 variables) – call 1 800 HOW EASI (469 3274).

ZIP4 (Z4) Conversion File

The record layout (1/1/2012) is:

Position	Name
1 – 5	ZIP Code
6 – 9	Plus 4
10 – 13	Carrier Route where alpha prefix can stand for: C – City Delivery R – Rural Route G – General Delivery (rural) H – Highway Contract (rural) B – PO Box (also business drops)
14 – 15	State Alpha
16 – 28	EASI Block Group Code (SSCCCTTTT.TTB) where S = State, C = County, T = Census Tract, B = Block Group codes
29 – 38	Latitude
39 – 49	Longitude (First position is minus sign)
50 – 55	Average Delivery Count for each ZIP4

The above files are for residential ZIP+4s only; the business-to-business ZIP Codes without population (population is 0) are not included in this file (call for more information).

These database files are both zipped into a single national file with all the ZIP +4's AND provided as 10 separate zipped files, split by the first ZIP Code digit.

Please call 1 800 HOW EASI with any questions.

The price for the current file is \$1,250.

Carrier Route/ZIP4 EASI Demographic Files

Each of the files below comes with the 9 digit ZIP Code (ZIP Code plus ZIP4) followed by the analysis variables. (Estimates are as of 1/1/2012). (Note: These estimates are all done using EASI's Z4 inverse-weight algorithm to estimate Census and other variables. Call 1 800 HOW EASI (469 3274) for a review.

Notes: Formats follow for Z4 – where Carrier Routes are purchased a Carrier Route Code would be substituted for the first two fields).

A. Medians and Averages

Position	Name
1 – 5	ZIP Code
6 – 9	Plus 4
10	Carrier Route Flag: C – City Delivery R – Rural Route G – General Delivery (rural) H – Highway Contract (rural) B – PO Box (also business drops)
11 – 15	Population 1/1/2011
16 – 20	Households 1/1/2011
21 – 25	Population Growth
26 – 30	Average Household Size
30 – 36	Median Age of Householder
37 – 39	Median Rent (\$) Housing
40 – 46	Median Value (\$) Housing
47 – 53	Median Vehicles Households
54 – 60	Median Household Income
61 – 65	Average Household Income
66 – 70	Per Capita Income
71 – 75	Median Age
76 – 80	% HH Income 200K Plus
81 – 87	High Income Average (\$)

B. Key Demographic Percentages

Position	Name
1 – 5	ZIP Code
