

## **EASI Partners with Associations for EASI Customized *and* Private Demographic Web Sites and eBooks**

### **Introduction**

Easy Analytic Software, Inc. (EASI) is a New York-based independent developer and marketer of demographic data and software solutions that provide reports and maps with unique search and analysis tools. EASI provides targeted site analysis software and updated demographics and related data for standard (Block Groups, Census Tracts, ZIP Codes, Cities, Counties, CBSAs, States, and the US) and customized geographies. Included with all software is an easy to use mapping tool that does address lookups, point maps, ring studies, create quintile analysis, and more. EASI has been in business since 1995 with over 1,500 clients who use our databases, software, and services.

Take a moment to read the [Testimonials at our Website!](#) While there you can also test our software - for free. EASI offers key reports from the 2000 Census. Thousands of corporate, magazines, colleges and other users go to our site for their Census demographics.

\*\*\*

### **EASI will transform our EASI web site into Your web site when we:**

1. Customize our site to reflect your organization's corporate colors and logo.
2. Develop new features for your users and remove features not relevant to your users.
3. Develop Custom Reports to make our data simpler for your users.
4. Link our site directly to yours, giving you your own private Demographic web site and product.

EASI can create a truly private web site that only your clients, your employees, your agents, salespeople, etc. can use. So tell us your desires and we'll be happy to develop a site together as a partner or in some mutually agreeable fashion - we are EASI to work with.

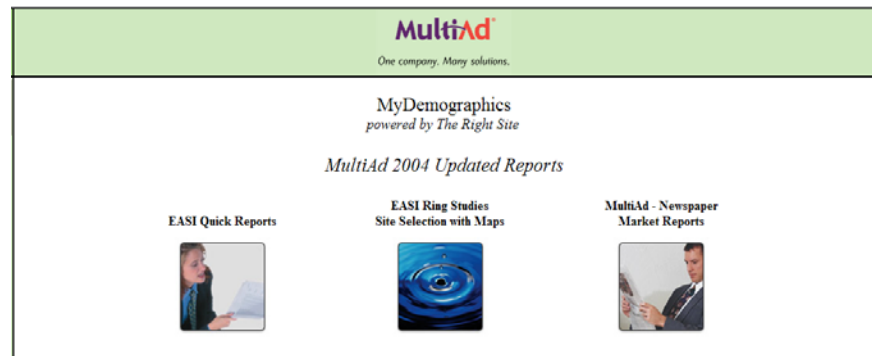

EASI has the **decades** of experience working with publishers, editors, associations, and others to carefully craft a dedicated worry-free web site that your users will return to over and over again.

Your users can find the ZIP Code with the highest median income, or the fast growing county, create an analytic map, or create some special custom analysis quickly and easily – all from your own web site.

## **Some examples of a custom web sites ...**

## A Revenue Maker

Our partners can design their own demographic web site with EASI software and data to *earn revenue* from use of this information.

**EASI Customized Web Sites can be supplemented with your own data or analysis tools!**

Note: EASI can modify sites with ZIP+4 analyses, Territory Creation, and other features.

## Or A Lead Generator

With FREE demographic and mapping analysis ONLY available to your customers, subscribers, members enter only through your web site.

From your own site you can link directly to our **Census 2000 Demographics** site. This includes current year and forecasted population and household

estimates, and a 1990 comparison. Your users can create reports (sample below) with maps and analysis for free.

Here's another site.

## The NAIS Demographic Center

As a first step in using the NAIS Demographic Center, we encourage you to run the Basic Reports for Independent Schools. They include variables that have been especially selected for their relevance in the decision-making process for independent school administrators, in such areas as admission. Once you feel familiar with these reports, we invite you to try the Additional Reports for Advanced Use, which provide a more sophisticated analysis of the demographic trends.

### Basic Reports for Independent Schools

**Summary Reports**  
These two summary reports include key demographic variables (e.g., school population, households, income, race/ethnicity, educational attainment) in the geographic area of your choice (block group, census tract, ZIP code, city, county, CBSA's, or state). The NAIS Summary Trend Report & Analysis presents these demographic variables for the year 2000, the current year, and a five-year projection; plus the percent changes throughout these year cycles. The NAIS Percent Summary Report & Analysis presents these variables for the current year and their values as a percent of the total and with respect to the entire country.

**Detailed Reports**  
The two detailed reports include a longer list of demographic variables in the geographic area of your choice (block group, census tract, ZIP code, city, county, CBSA's, or state). The
